### DETAILED ACTION

1. The action is a new Non-final Office Action due examiner oversight of claims 3-22 which were not been acted on.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 8-12, 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Shaw et al.

Regarding claim 1, Shaw et al., discloses a microelectromechanical lateral accelerometer with features of the claimed invention including a substrate (see claim 1), a cantilever conductive beam (for example, element 380 in figure 17), along with related connections (element 396).

Regarding claims 2, 4, 5, Shaw et al., discloses means to apply stress to the beam (see claim 1, moving beam element).

Regarding claims 3, 11-12, Shaw et al., teaches conductive pads (see, for example, claim 14).

Regarding claims 8-10, the beam has fingers (or arms, see col. 7, line 56).

Regarding claim 19, 21, Shaw et al., teaches the use of capacitance meter (see, for example claim 6).

Art Unit: 2855

Regarding claim 20, the beam is made of material.

4. Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 13-18, and 20 are allowed over the prior art of the record mainly for the inclusion of the step of exposure of the beam to environmental corrosion.
